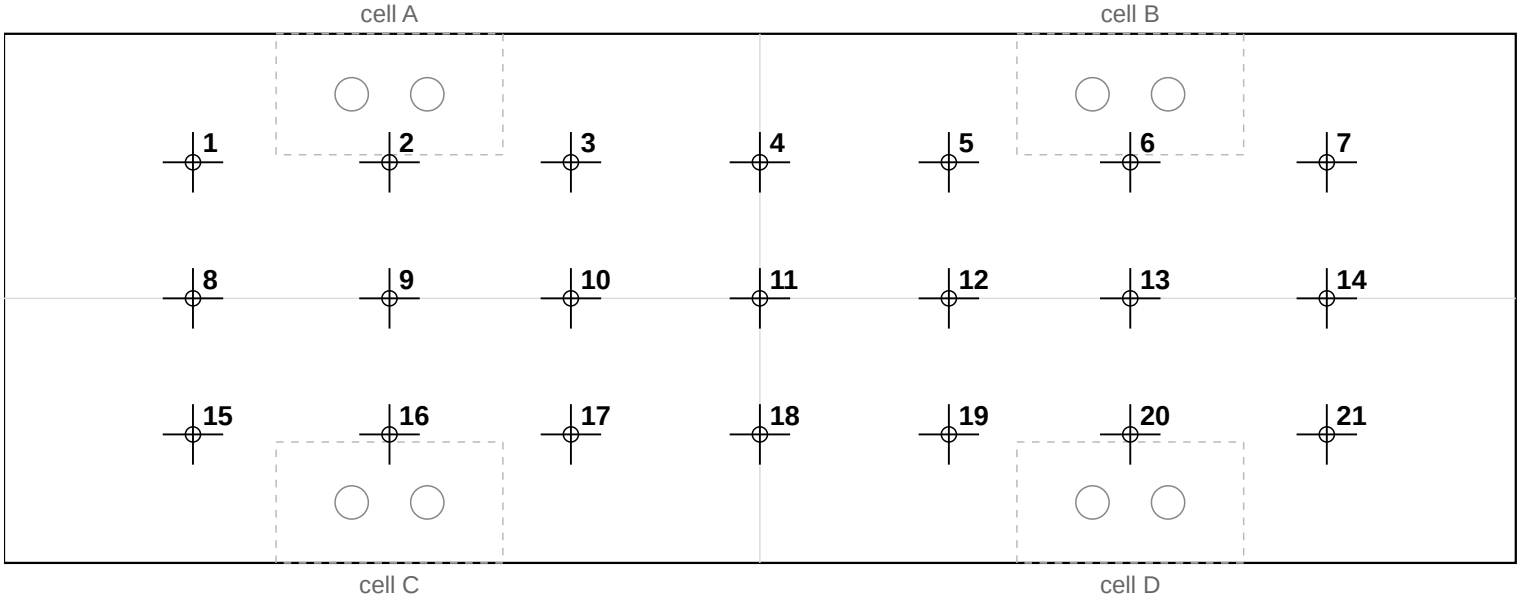
Force plate calibration template — 200 × 70 mm plate (forcePlate.pdf)

Print at 100 % / "Actual size", then check the bar below is exactly 100 mm. Cut along the outline, line it up with the plate edges (grey circles = bolt holes), tape it down.

Frame: origin = plate centre, **x** along the 200 mm length (→), **y** across (↑). Centre the weight on the crosshair. Dashed boxes = the pads under the plate, one load cell each (A–D).



1 x -75 y +18	**8** x -75 y +0	**15** x -75 y -18
2 x -49 y +18	**9** x -49 y +0	**16** x -49 y -18
3 x -25 y +18	**10** x -25 y +0	**17** x -25 y -18
4 x +0 y +18	**11** x +0 y +0	**18** x +0 y -18
5 x +25 y +18	**12** x +25 y +0	**19** x +25 y -18
6 x +49 y +18	**13** x +49 y +0	**20** x +49 y -18
7 x +75 y +18	**14** x +75 y +0	**21** x +75 y -18
